Professional Summary

DevOps and Site Reliability Engineer with 3+ years of experience building CI/CD pipelines, automating release workflows, and supporting hybrid infrastructure across on-prem and cloud environments. Strong focus on deployment reliability, rollback readiness, scripting, observability, and production incident response.

Experience

Varun Group | DevOps Engineer / Site Reliability Engineer | Jan 2025 - Present

- Built multi-environment CI/CD pipelines across DEV, QA, UAT, and PROD using Jenkins, GitHub Actions, GitLab CI/CD, and Bitbucket Pipelines.
- Automated branch-based deployments with Bash and Ansible to reduce manual release handling and improve consistency.
- Implemented release governance, rollback strategies, cron automation, health checks, and database backup workflows.
- Managed production incidents, performed RCA, and improved deployment confidence with rollback-ready operations.

Amunik Software Solutions Pvt. Ltd. | DevOps Engineer | Mar 2023 - Dec 2024

- Managed AWS infrastructure across EC2, ALB, Auto Scaling, S3, IAM, RDS, and Route 53 for secure application hosting.
- Built and maintained Jenkins and GitHub Actions pipelines to improve release repeatability.
- Configured CloudWatch, Prometheus, and Grafana dashboards with alerting for proactive production monitoring.
- Supported Docker-based deployments and scaling design across private/public network architecture.

Pivotal Software Solutions Pvt. Ltd. | DevOps Intern | Feb 2022 - Feb 2023

- Supported AWS environments using EC2, VPC, IAM, and Linux servers.
- Assisted in Jenkins pipeline setup, deployment support, and environment configuration.

Technical Skills

CI/CD Pipelines, Release Management, Rollbacks, Incident Management, RCA, AWS, Azure (Basic), Jenkins, GitHub Actions, GitLab CI/CD, Bitbucket Pipelines, Bash, Python, Ansible, Docker, Kubernetes, Prometheus, Grafana, CloudWatch, Linux, Nginx, Apache, Tomcat, MySQL, PostgreSQL, MongoDB, PgBouncer, Nexus, SonarQube

Key Achievements

- Implemented zero-downtime deployment pipelines with rollback mechanisms.
- Restored critical production databases after accidental deletion using backup strategies.
- Automated deployment and database workflows, reducing manual operational effort.
- Optimized PostgreSQL performance using PgBouncer and configuration tuning.
